Office and Works
32d and Walnut Sts.,
Philadelphia.

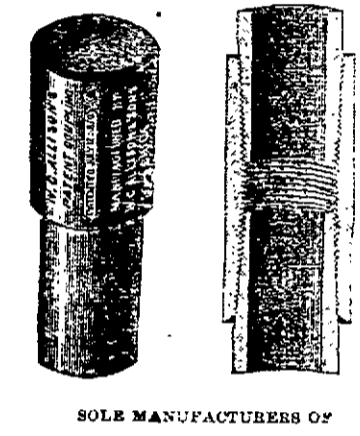

TRADE  MARK.

BRANCH OFFICE
FERTIG BLOCK,
Titusville, Pa.

MANUFACTURERS OF

LAP WELDED

Tubing & Casing
Both Plain and Galvanized,
for Oil and Salt Wells,
American Charcoal
Iron Boiler Tubes,
Lap Welded Tubing for
Steam and Water.

SOLE MANUFACTURERS OF

W. C. ALLISON'S
PATENT JOINT

OIL WELL TUBING.
This unique tubing is furnished with heavy sockets, and is made with a vanishing seam, corresponding exactly with the thread in the socket, so that when screwed up, it has a bearing surface of one-half of the circumference of a deep thread on the tube at the end, thus obtaining the ability to break at the joint without the vibration of the pump.

Each length of socket is stamped with our trade mark, and is carefully tested before shipment with a hydraulic pressure of 1,000 pounds to the square inch.

W. C. ALLISON & SONS.

Foreign News.

LONDON, April 24.

The steamer Almazia, from New York, touched at Plymouth, Saturday, en route for Hamburg.

PARIS, April 24.

General Cluseret reported to the Committee that a suspension of hostilities at Neuilly will be arranged to date from noon to day. He also reports that affairs at Asnières are in excellent condition. There was no great movement of the troops yesterday. Immense defensive measures are in preparation. Torpedoes have been planted at St. Omeraine and Vincennes. Railway stations and batteries erected in the Rue Castelain. Committee has apologized to the Gas Company for the recent seizure of its gas meter. The churches of St. Roch and St. Stephen have been reopened and their cures released from imprisonment.

VERSAILLES, April 24.

President Thiers has given a reception to a delegation from the Masonic Lodges of Paris, who asked on behalf of the people of the capital for an armistice. In reply Thiers said General Le Admire had power to grant a truce whenever it should become necessary, but that the Committee could never be recognized by the Government.

LONDON, April 24.

The steamship City of Limerick, which left Liverpool on Saturday, is at Queenstown, disabled, with one thousand passengers, and must be repaired before leaving for New York.

PARIS, April 10 (by mail).

On Friday last a well-meaning crowd broke into the shed where the gallionette kept—a brass gunpowder, say the papers on new and improved principles—and dragging it to the foot of the statue of Voltaire, broke it into pieces and burned it until the apples of the public.

NEW YORK, April 24.

English papers pay steamship Deutschland and report the death of Schamyl, recently at Medina.

Tuesday, April 25, 1871.

The Reign of Terror in Spain.

Hundreds of workmen in the coal fields of Pennsylvania see their families in want; they are themselves eager to earn wages, and mine owners are ready to employ them at rates entirely satisfactory to both. Yet the mines stand idle and the masters starve.

Six days ago twenty-seven miners agreed to return to begin work Friday morning; but when time came all but two were afraid, and broke their agreement, although the civil authorities, with the military power of the State at their call, promised to give them all the protection in their power.

The dread these men have for the terrible secret conspiracy which enforces the decrees of the trades union known as the Workington's Benevolent Association is the only obstacle to the resumption of mining and to cheap coal. No man in the coal regions is safe who dares to work or to employ workmen when that body proclaims a suspension. The condition of society in any of the most disturbed of the Southern States, is peace and freedom as compared with that in Northern Pennsylvania.

A Good Show.

During the last Presidential campaign, all the changes were rung on the National debt. We were told that it never ought to be paid, that it never would be paid. The platform on which Grant was elected, however, was pledged to keep faith with the National creditors, and to devote the resources of the Government to the reduction of the legacy of the war. And month by month, for the past two years, has the Republican Administration shown its balance-sheets and demonstrated its faith-stewardship. The words of Senator Morton in this connection should sink deep in the memories of the American people, when passing judgment on the first half of President Grant's term of office, and in contemplating its financial chapter alone and by itself.

On the adjournment of Congress, when a long interval of months must ensue before the fall elections, and when for a season political issues and questions will be in abeyance, it is fitting to take a glance of review at the work already accomplished, at the result of the honest execution of the laws. This is the exhibit of Senator Morton, and it may boldly challenge scrutiny:

Under this Administration, within twenty-five months, but half, two hundred and ten million dollars of that we have been paid, more than a twentieth part of the entire debt. How has it been paid, as compared with the last Administration? Not by increasing taxation, but by faithful and honest collection of the revenues, and by economy in every department of the Government. In paying off the debts we have saved more than twelve and a half millions in the annual interest, and a sum equivalent to the amount of this time eighty-three millions of dollars in taxes have been taken off, and if this administration continues successful, and the laws are well and faithfully administered, there can be no doubt that it will be done. It cannot all be done at once, it must be done considerately, and it all must be done with reference to this debt, which has got to be paid some time, and to the payment of which, it is intended to diminish demands and remove features of the budget which are objected to, but generally defended its recommendations, and especially for the match-tax. The Hornet has given notice that he will make a line of fortifications to guarantee against all attacks on the occupied provinces of France until the indemnity is fully paid and a regular government firmly established.

LONDON, April 24.

An immense number of match manufacturers and their hands, bearing petitions against the match tax, addressed to the Parliament building this afternoon and crowded the approaches to the House of Commons. A strong force of police was on the ground and maintained order, although the crowd was very noisy and turbulent. A large procession from East London approaching the Parliament was dispersed by the police to prevent danger from the accumulation of such masses of people.

LONDON, April 24.

In the House of Common George Dixon, member for Birmingham, gave notice of a motion against the tax on matches. At the same time he argued to demonstrate the fallacy of the reasons for exacting larger revenue from the increasing activity in cotton fabrics and the diminishing price of cotton. The sum total demanded by the government, he said, was inordinate and unexampled in time of peace.

A great many of the members of the House of Commons, and others, supported him, and the motion was carried.

BOSTON, April 24.

The statement made in the press some days ago by Mr. M. C. Cheezy, of Boston, had scarcely administered a check to the rate of confirmation, which was wholly incorrect. He merely admitted to the Lord's Supper those who were ready and anxious to be confirmed.

The State Treasurer of Illinois to-day issued a statement of the amount of bonds.

The rate of confirmation was three million dollars and five thousand dollars of canceled State bonds being the amount of the State debt recently established.

Major Powell, the Colorado explorer, has been arrested at Denver, and is now in jail, and will be tried on Saturday afternoon.

CLARK, HAYES & CO.

DEARABLE INVESTMENT.—The subscribers offer from this date forward their stock at bare cost.

We wish to say in this connection, this is no hunting sale, but positive, as the first of May ends our year. Shall go out of business as soon after as possible. To any respectable party or parties desiring a choice fresh stock of goods, with lease of building in the most desirable part of the city, we will give good terms, and invite their early attention to a most remunerative investment. To the trade who have favored us with their patronage, we return thanks, and now often them all the benefits of our purchases through long experience in the grocery business. We have a fine stock of imported and domestic liquors, which dealers shall have a like benefit of. Our stock is the largest and best selected in this part of the State, and shall be closed out at cost.

CLARK, HAYES & CO.

Titusville, April 11, 1871.

LOOK TO YOUR HEALTH.—McDonald's Tolu Cough Syrup. Money refunded for every bottle that does not effect a cure.

If you want a Store of any kind, call on B. W. Murray before you purchase.

SUITES FOR SALE, fine, all in fine order and of good style. Ad-

dress to owner at HERALD office.

NEW CASES FOR SALE, fine, all in fine order and of good style. Ad-

dress to owner at HERALD office.

FIRE STOCK

SPRING & SUMMER

LOCAL NOTICES.

Church Run.

Editors Morning Herald:

I have been much interested in reading the articles published in your paper, of the statistics of operations on Church Run territory since 1860. I doubt whether any similar area of producing territory in Venango county, will show as gratifying an exhibition, when we take into account the money invested, the quantity of oil produced and the duration of the wells. It is not a little singular that it should be so, must be constantly fed and excited by something new as well as useful. Audiences will get tired of platitudes and commonplace. There is a large class of intelligent persons who are indifferent to literary or problems of history, and are uninterested with social reforms. They demand something practical, scientific truth and phenomena, illustrative of natural or physical law. The next course of lectures here, if we are to have one, should gratify this class, as well as the lovers of belles-lettres, or music. We should aim at a variety, a kind of menu, or mixture of science, art, literature, comedy. Lecturing is now a profession in itself; as well or better paid, than the liberal professions, so well paid that the standard ought to be raised, and the price graduated to merit. It is during the summer that the lecturers make their engagements for the ensuing season, and we have some of the best—G. Phillips, F. C. Phillips, etc.—already engaged for Titusville. We presume the Y. M. C. A. will in due time publish the result of the recent course and announce in what manner the proceeds are to be invested, for the foundation of a library or reading-room, which is understood to be the aim and object of the course of lectures given under their auspices.

Varieties.

—All the May Magazines for sale at Hurd's.

—Charge of the light brigade—gas bills.

—The Soda fountains are all in full play again.

—Advertising is the oil which wise men put in their lamps.

—Reporters ought to be able to live cheaper than anybody else, because they are continually getting hired for nothing.

—The sale of reserved seats for the Richings-Bernard opera commences at 9 o'clock this morning.

—What has become of the project of building a street railroad from the toll-gate to Hydetown?

—Now that the dead-lock is unlocked at Harrisburg, there is hope for the charter amendments.

—Jimestown is having another theatrical.

—Crawford county is honest both in independent senatorial district.

—The Appy Concert Troupe have not yet come into liquidation, as reported, but are still concerting on the east.

—The Odd Fellows of Erie propose to celebrate the fifty-second anniversary of the establishment of the Order in this country, on Wednesday evening next, at Erie, as a social party, supper and ball.

Experiment No. 3. Three gallons of oil gave 283 cubic feet of gas, which is equal to 82 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.11 candles, and this corrected for five foot consumption by "squaring" gives 24.02 candles.

Experiment No. 2. Three gallons of oil gave 283 cubic feet of gas, which is equal to 82 cubic feet per gallon. Time, one hour; heat, dull cherry color. With five foot consumption, 30 per cent of hydrogen mixed with this oil gas, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.92 candles.

Experiment No. 1. Three gallons of oil gave 283 cubic feet of gas, which is equal to 82 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.82 candles.

Experiment No. 4. Three gallons of oil gave 283 cubic feet of gas, which is equal to 82 cubic feet per gallon. Time, one hour; heat, bright orange. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.72 candles.

Experiment No. 5. For the following experiments the retort was fitted with an inch pipe, and return buns for the purpose of exposing the gas more to the action of a heat. Three gallons of oil gave 197 cubic feet, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of five cubic feet per hour, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.62 candles.

Experiment No. 6. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.52 candles.

Experiment No. 7. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.42 candles.

Experiment No. 8. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.32 candles.

Experiment No. 9. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.22 candles.

Experiment No. 10. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.12 candles.

Experiment No. 11. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 23.02 candles.

Experiment No. 12. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.92 candles.

Experiment No. 13. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.82 candles.

Experiment No. 14. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.72 candles.

Experiment No. 15. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.62 candles.

Experiment No. 16. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.52 candles.

Experiment No. 17. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.42 candles.

Experiment No. 18. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.32 candles.

Experiment No. 19. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.22 candles.

Experiment No. 20. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.12 candles.

Experiment No. 21. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 22.02 candles.

Experiment No. 22. Three gallons of oil gave 197 cubic feet of gas, which is equal to 62 cubic feet per gallon. Time, one hour; heat, dull cherry red. With a consumption of 34 cubic feet per gallon, the illuminating power was 15.00 candles and this corrected for five foot consumption by "squaring" gives 21.92 candles.

Experiment No. 23. Three gallons of oil gave 197 cubic feet of gas, which is equal
